RF LIQUID HEATING FUELS BURNER

PRODUCT SHEET

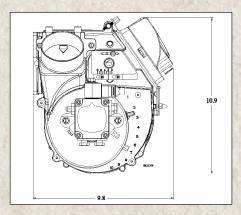

Description

The RF burner is the first burner specifically designed and tested for use with Biodiesel blends up to B100, Renewable Diesel Blends up to R100, traditional #1 and #2 Fuel Oil. (Heating Oils Type #0, #1 and #2 in Canada)

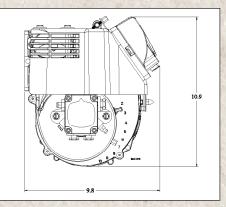

Category Feature Benefit				
Improved Combustion	Quiet Performance	RF has increased air capacity and quiet operation		
	Head Design	Burner head design ensures a stable flame base for all fuels and reduces coking		
	State-of-the-art airflow	The RF airflow design boosts velocity by utilizing the whole air tube, resulting in better combustion with optimized air flow		
ATT THE REAL PROPERTY.	Air Intake	The fuel pump is separated from the fresh air intake, improving burner performance during cold air intake		
A STATE OF THE PARTY OF THE PAR	Adjustable Flange	Burner-in-a-box provides an adjustable flange with a 2° pitch built-in for optimal performance		
	Increased Air Capacity	Highly adjustable with air guides, adjustable head setting and single air adjustment band		
Versatility	Fuel Agnostic Combustion Technology (F.A.C.T.)	Easily transitions between No. 2 and B100/R100 fuel types		
	System Flexibility	Approved specs operate in various scenarios; tested with #2 and up to B100 fuel oil, with and without baffles, direct and chimney vents		
	Outside Air Adapter	Allows ducting from virtually any directions		
	Air Proving Kit	The air proving switch kit easily adds combustion air proving (CAP) to any RF burner installation		
	Flame Shaping	Nozzle line assembly and airflow adjustments provide more effective flame shaping through two distinct adjustments.		
	Flame Sighting	RF cad cell's position offers greater tolerance and reduced position sensitivity		
Ease of Use	Optimized Air Intake Design	Features a built-in fresh air intake system, isolated from the pump bleed port, reducing the risk of oil entering the burner housing		
	Air Adjustment w/ Ducting	Easily and accurately adjust air with the ducting in place, without needing to remove a cover		
	Readily available Beckett parts	Utilizes the same major component parts found on other Beckett burners		
	Optimized design for user simplicity	The z-dimension is easily set by inserting the nozzle line flush with the end of the air tube		
	Ease of access to service	The control and igniter mounted on a single plate simplify nozzle line access and offer wide-open access to the burner interior and wiring

Technical Specifications

Capacity

- · 0.38-3.00 GPH
- · 56,000-420,000 BTU/Hr

Fuels

- · ASTM D396 #1 & #2 Heating Oil
- ASTM D396 -B6 B20 Biodiesel Blends
- ASTM D6751 for B100
- ASTM D975 for Diesel Fuel and Renewable Diesel
- CAN / CGSB 3.2 for Heating Oil Types #0, #1, and #2

Dimensions

- · Height 10.9"
- Width 13.700"
- Depth 9.835"

Electrical

- 120 VAC / 60 Hz
- 5.8 Amps Maximum

Standard Components

1/7 HP 3450 RPM Type PSC

Igniter

PowerLight® Solid-State-Continuous Duty

Fuel Pump

- · CleanCut® PF2032x Single Stage
- · CleanCut® 2-Stage available -**Contact Factory**

Primary Control

· GeniSys® 7565 with myTechnician® programming and diagnostics

Ordering Information

RF Universal Burners - (Built with white air guide and a 2 degree pitched flange)					
Part Number	Description	GPH Range	Air Guide Installed		
RF101	7" Air Tube with Adjustable Flange	0.38 - 1.25	White 2.0" Diameter - Universal		
RF102	7" Air Tube with Adjustable Flange	1.00 - 1.75	Blue 2.5" Diameter - Universal		
Air Guides - (Red and blue air guides are included with Univeral Burners)					
Part Number	Description	Feature			
33232-001U	Red 1.5" Diameter - Low Rate / Low Air	Enhances air adjustability for low firing rates and natural draft applications			
33232-002U	White 2.0" Diameter - Universal	Works in most applications (Mounted in Universal Burners)			
33232-003U	Blue 2.5" Diameter - High Rate / High Air Increases air capacity for high firing rates and positive pressure a		firing rates and positive pressure appliances		
RF Burner Accessories					
Part Number	Description	Feature			
51633U	Adjustable Flange with a 0 Degree Pitch	Used when no pitch is needed			
51634U	Adjustable Flange with a 2 Degree Pitch	Standard for the RF Burner (Included with Universal Burners)			
52683U	Air Proving Switch Kit	0.50" Water Column (Standard)			
52683-002U	Air Proving Switch Kit	0.25" Water Column (Optional for high rate)			
52682U	Outside Air Adapter Kit for RF Burner	3" Galvanized Adjustable Elbow, 4"x3" Galvanized Reducer, 4" Fresh Air Intake Hood
